Release Notes: CrayCray

Release number 4, Group 20, 2013-10-04

Overview:

Since previous release a built-in game of Russian Roulette has been added to the program. Small bugs have been fixed and features such as drinking "happy potion" have been added. CrayCray becomes sad and starts to cry when it is not cuddled with for a while, and if it is ill a long time it dies.

Purpose:

The purpose of the forth release was to add the remaining user stories.

- CrayCray can now be entertained through playing Russian Roulette.
- CrayCray becomes ill when not treated well.
- The user is able to cure CrayCray when it is ill.
- If CrayCray is ill a long time it dies
- The user is able to read about how to play CrayCray and thereby taught how to play it.
- When CrayCray is not cuddled with for a while it starts to cry.
- The feature Drink Happy Potion has been added.

Issue Summary:

Previous bugs in hunger level and the setting of facial expressions is now fixed.
